## **HANK EMERY SCHOLARSHIP**

The New England Chapter of GITA is pleased to solicit applicants for the Hank Emery Scholarship. This is the sixth year the New England Chapter has been honored to be the administrator of this prestigious award.

Mr. Hank Emery was instrumental in creating the Keystone conference, which blossomed from the AM/FM International Organization. As GIS and technology matured, it became clear that the organization was more than just an automated mapping and facilities management group. The new name of Geospatial Information & Technology Association replaced the old. And so Hank's work at the Keystone conference has transformed into the foundation of the present day Geospatial Information & Technology Association (GITA) annual conference. Hank is also a co-founder of GITA.

Mr. Emery is a graduate of the University of Maine. As a New Englander, this scholarship in his name is available to students in New England Colleges. He has a keen interest in seeing that GIS education continues in the future.

The Scholarship offered in Hank's name is for \$2,000. This scholarship will be awarded to a student attending a New England college, university or technical institute that has a good scholastic aptitude and a genuine interest in pursuing a future in geospatial information & technology.

Along with the scholarship, the New England Chapter will provide a pass to the New England Spring Conference that is sponsored by the New England Chapter of GITA.

**Please send the completed application to:**
